**Re: COLUMBIA RIVERKEEPER MEMBER COMMENTS ON THE U.S.  
DEPARTMENT OF ENERGY'S CATEGORICAL EXCLUSION FOR  
ADVANCED NUCLEAR REACTORS Docket ID: DOE-HQ-2025-0405**

U.S. Department Energy

The following letter regarding the U.S. Department of Energy's Categorical Exclusion for Advanced Nuclear Reactors was signed by 1,912 Columbia Riverkeeper Members.

*Dear U.S. Department of Energy,*

*I oppose the granting of a new categorical exclusion (CX) under the National Environmental Policy Act (NEPA) for new nuclear reactors. CXs are reserved for federal actions that **do not** significantly affect the quality of the human environment. At this juncture, it's impossible to know if new nuclear reactors, such as Small Modular Nuclear Reactors (SMNRs), meet this definition since none have been built in the United States.*

*Applying a CX to new nuclear reactors would effectively fast track approvals and reduce federal oversight over the nuclear industry. Perhaps even more concerning, this exclusion will make it easier to develop nuclear reactors at the Hanford Nuclear Site, a location being targeted by industry. Hanford cleanup is at a crossroads, with increased pressure for new development threatening to derail a thorough and protective cleanup. This is unconscionable. Such a move threatens people, the environment, and clean water for generations to come. We in the Pacific Northwest refuse to add more waste to our nuclear waste burden. I urge the federal government to rescind the reckless CX for new nuclear reactors and maintain full NEPA review for all nuclear reactor proposals.*

*Sincerely,*

COLUMBIA RIVERKEEPER

P.O. Box 950  
Hood River, OR 97031  
(541) 387-3030  
[columbiariverkeeper.org](http://columbiariverkeeper.org)

Many of those who signed this letter also wrote individualized comments (see attached).

Sincerely,

A handwritten signature in black ink, appearing to read "Simone", written in a cursive style.

Simone Anter  
Senior Attorney & Hanford Program Director  
Columbia Riverkeeper

Being upfront with all of the public needs to happen. Science knows what can happen, and those words need to be told to the public. And ALL of

So much for 'transparency'. This toxic waste will spread and we're seeing clearly - right now - that depending on 'normal precipitation rates' is not viable or reasonable. This is not a process that can be rushed without imperiling the health and safety of we, the people. Stop pushing this process. Some things cannot be rushed without penalties to be paid by all of us.

As the daughter of a scientist who has followed this issue, I am especially concerned.

Federal energy projects have historically ignored First Nation treaty rights and federal laws requiring tribal consultation. The Columbia River is vital to a vast region of Oregon and Washington citizens and our way of life, including commerce and many forms recreation and fishing. I live in White Salmon, Washington. Many giant energy projects are being proposed that threaten our way of life downstream from these projects. The few remaining sacred traditional hunting and gathering lands used by local Tribes must finally be protected from further destruction. Hanford residents are at risk once again from greedy corporate energy projects in our region. The workers on these projects, the people in Tri-Cities and all of our local communities deserve a right to be told the truth about what is being proposed, what it will cost, what the power will be used for, who will benefit, and how it will impact our lives and our children's lives in the future. We have a right to participate in the decision making process on all of these projects. This has been an issue for decades. It's time to finish this!

The waste at this site must be treated and disposed of in a way that is consistent with the hazards it can cause. The site cannot be left as it is. Having radioactive waste contaminate the Colorado River must NOT happen!!!

I pay taxes. Clean this area, but do it sensibly, according to our guidelines. Maybe get some politicians in there to do the work? Or millionaires can do the hard work of clean-up. I bet things would happen a lot differently. Tell me I'm wrong.

For the first 65 years of my life I lived downwind from Hanford. My mother suffered from thyroid cancer and died from liver cancer, probably the result of Hanford pollution. Please protect all survivors from as much pollution as possible.

Do you not love your children, grandchildren?

People and the environment we live in are more important than profit & politics

The US government has been trying to bury the past and truth about Hanford. It's been disgraceful and harmful for humanity to be left with this misuse of land once in indigenous hands. CLEAN IT UP SAFELY AND FOREVER!

347	12/18/25	daydreamer369q@gmail.com	Beth	Estelle	CO	the nuclear industry is not clean, safe or inexpensive. Patents for that kind of energy has been hidden and buried, and we need to use it now. Push is on for small nuclear reactor that reprocess nuclear waste to make more plutonium..deadly for half life of 24,000 years..and we still don't know what to do with nuclear waste we are storing on site! meanwhile, military use of nuclear is expanding..plutonium bomb pits being manufactured. we seriously need a different direction.. an organized global effort to save ourselves and our planet! Thank you for your desire to clean up Hanford... Beth Estelle

Every bit of ecological/environmental legislation that Donald J. Trump and his gutless ReTrumpLican sycophants create is fraudulently misnamed and promoted with disinformation-laden lies driven by political bullying and perverted negotiations only does the opposite of what it promotes. Instead of maintaining or increasing protections, or improving the health of its ecosystem and wildlife, they always, ALWAYS remove or reduce current protections, eliminate development restrictions, or allow some form of 'privatization or control by their own personally involved politically corrupt sponsors or dark money funders. The USA CANNOT AFFORD TO LOSE ANY MORE OF ITS DWINDLING PRISTINE PUBLIC NATURAL RESOURCES NOR CAN IT AFFORD NOT TO RECLAIM and RESTORE ALL of its HISTORICALLY HUMAN POLLUTED or POISONED LANDS, WATERS and AIR FOR FUTURE GENERATIONS (your children and grandchildren) TO ENJOY.

Transparency is the validation of an agency. Without it, the public can only suspect the worse. Release the modeling so that the public--including those of us trained in science--can evaluate it for ourselves. Who knows, maybe we can give you helpful suggestions. As of now, you only have our suspicions.

Transparency always.

Its waste disturbs the climate which impacts everything, and that distortion stems from inordinate supply-side money controlling governance, itself stemming from unpracticed Golden Rule relationship amongst the electorate: Interpersonal trust is essential for functional capitalism! Whatever we do, we must NOT concede to this GOP dictatorship by demeaning the health of ALL others thinking, 'I'm OK!' The autocrat's world wherein all are jockeying for power/dominance in every interaction because all/everything, is just an 'other,' a 'not me,' in their tiny, self-flagellating, self-consumed, fantasy, is one in which the joys of organic existence are effortlessly overlooked/ignored/dismissed. It's shameful WE allowed thieving cheats to seize POWER, and now we have to cheat the cheats to get it, the narrative, the zeitgeist, back to reality just to stop the cheating!?!

I live in the Tri-Cities and this is crucial work, to be done safely, openly and transparently!!

What's the rush if the groundwater is not threatened and virtually self-contained? Why proceed, instead of allowing for radioactive decay (in this case 30 years), which could greatly reduce worker exposure and the potential for airborne release?

Public safety is the FIRST Priority.

I do not trust the Department of Energy because they are pampering to this administration and do not care if radioactive releases are happening.

Stop 'The Donald' at all costs!

530	1/21/26	chydyca@gmail.com	cathryn	Chudy	WA	I live in Vancouver, WA and am concerned about the health and safety of our river community so what happens at Hanford affects us ultimately. It is disturbing that relevant information was withheld from we the general public, that makes a difference in understanding decisions being made and realizing that there are risks to what is currently under way that could be prevented by choosing a different path that would make worker safety a priority as well as the safety of the surrounding environment at Hanford. Being in a rush to be able to stamp 'cleaned up' and proceed to development is not in the best interest of doing real cleanup and protect public/worker safety, which should be bottom line for decision makers. Demolition plans should be updated and presented to we the public in a public meeting at an easily accessible location, as soon as possible. The legacy of secrecy must stop and public questions and comments thoroughly answered before proceeding. A slower, more cautious approach to this

This should be a lesson for the future, when considering using this type energy for supplying electric, since there are alternatives that are safer and don't have a such a long term effect on the environment.
